

# RFID Sterile Services

**Increase asset visibility, reduce loss and enhance care delivery**

Losing surgical instrument trays, whether owned or rented is both expensive and can delay patient care. It can even lead to the cancellation of operations. Using RFID, Zebra places the ability to quickly find trays and perform inventory counts into the hands of any hospital team.

- Stock-take in minutes, not days
- Track inventory, anytime
- Locate loan and own kits, fast
- Save on staff 'searching' time
- Improve on-time surgery start times

## Inventory management

- Enable automated, accurate, real-time tracking
- Enhance visibility and ID usage patterns
- Optimise procurement and avoid overstocking/stockouts
- Replace tedious manual stock counting with inventory counts in minutes

## Workflow optimisation

- Automate tracking through prep, use, cleaning and sterilisation
- Bolster efficiency by cutting manual tasks & paperwork
- Obtain real-time status & location data
- ID bottlenecks for timely intervention and process tweaks

## Patient safety

- Reduce errors and contamination
- Ensure correct tray for procedure
- Track trays to patients for traceability and recall management

## Sterilisation management

- Ensure cleanliness for patient safety
- Track cycles, expiration dates and more

## Maintenance and servicing tracking

- Streamline schedules
- Track service records
- Optimise performance and longevity
